

AibGenesis™ Mouse Anti-Bacillus Phage 000TH010 DNA Binding Protein Monoclonal Antibody

Cat. No.: VRS-0124-YT1815

This product is for research use only and is not approved for use in humans or in clinical diagnosis.

Product Overview

Target	DNA binding protein
Specificity	This antibody is specific for DNA binding protein of Bacillus Phage 000TH010.
Clone	TJ0871
Host Species	Mouse
Antibody Isotype	IgG
Species Reactivity	Bacillus Phage 000TH010

Product Properties

Immunogen	Synthetic peptide corresponding to partial sequence of DNA binding protein.
Purity	>95%

Packaging, Storage & Formulations

Form	Liquid, please specify if lyophilized powder is required.
Formulation	PBS (pH 7.4) without any preservative, please specify if any additional requirements.
Preservative	Preservative-free, please specify if any additional requirements.

Applications

Application	ELISA
Application Notes	The antibody is screened by ELISA using the synthetic peptide that corresponds to a partial sequence of Bacillus Phage 000TH010 DNA binding protein as the capture antigen. Additional applications have not been validated. It is recommended that the

end users validate other applications and determine optimal concentrations/dilution under their experimental conditions.

Other Product Details

Type	Primary Antibody
Clonality	Monoclonal
ProAb	Made to order

Virus Details

Virus Classification	Double-stranded DNA virus
Virus Name	Bacillus Phage 000TH010
Virus Alternatives Names	Bacillus phage; Bacillus phage 000TH010
Genome Composition	dsDNA

Target

Introduction	A Bacillus phage is a member of a group of bacteriophages known to have bacteria in the genus Bacillus as host species. Bacillus phage 000TH010 has been found to belong to family Siphoviridae.
Target Alternative Names	68, 000TH010_68
UniProt ID	A0A5P8 PHV2

AibGenesis™

is an advanced AI-driven platform designed to create novel antibody sequences with unprecedented speed and precision. By integrating deep learning, structure prediction, and comprehensive immunological datasets, **AibGenesis™** intelligently designs antibodies optimized for affinity, stability, and developability. The platform generates antibody products that support basic scientific research, drug development, and diagnostic applications.
