

AibGenesis™ Mouse Anti-Bacillus Phage VB_BpuM-BpSp B-family DNA-polymerase Monoclonal Antibody

Cat. No.: VRS-0124-YT2223

This product is for research use only and is not approved for use in humans or in clinical diagnosis.

Product Overview

Target	B-family DNA-polymerase
Specificity	This antibody is specific for B-family DNA-polymerase of Bacillus Phage vB_BpuM-BpSp.
Clone	TJ1862
Host Species	Mouse
Antibody Isotype	IgG
Species Reactivity	Bacillus Phage vB_BpuM-BpSp

Product Properties

Immunogen	Synthetic peptide corresponding to partial sequence of B-family DNA-polymerase.
Purity	>95%

Packaging, Storage & Formulations

Form	Liquid, please specify if lyophilized powder is required.
Formulation	PBS (pH 7.4) without any preservative, please specify if any additional requirements.
Preservative	Preservative-free, please specify if any additional requirements.

Applications

Application	ELISA
Application Notes	The antibody is screened by ELISA using the synthetic peptide that corresponds to a partial sequence of Bacillus Phage vB_BpuM-BpSp B-family DNA-polymerase as t

he capture antigen. Additional applications have not been validated. It is recommended that the end users validate other applications and determine optimal concentrations/dilution under their experimental conditions.

Other Product Details

Type	Primary Antibody
Clonality	Monoclonal
ProAb	Made to order

Virus Details

Virus Classification	Double-stranded DNA virus
Virus Name	Bacillus Phage vB_BpuM-BpSp
Virus Alternatives Names	Bacillus phage; Bacillus phage vB_BpuM-BpSp
Genome Composition	dsDNA

Target

Introduction	A Bacillus phage is a member of a group of bacteriophages known to have bacteria in the genus Bacillus as host species. Bacillus phage vB_BpuM-BpSp has been found to belong to family Myoviridae.
--------------	--

Target Alternative Names	Bp8pS_207
UniProt ID	A0A141 HS98

AibGenesis™

is an advanced AI-driven platform designed to create novel antibody sequences with unprecedented speed and precision. By integrating deep learning, structure prediction, and comprehensive immunological datasets, **AibGenesis™** intelligently designs antibodies optimized for affinity, stability, and developability. The platform generates antibody products that support basic scientific research, drug development, and diagnostic applications.
